

# Do you have a child with ADHD?

## Call for Research Participants!

### PURPOSE

The purpose of this study is to understand Black maternal figures' decision making for their youth with ADHD, including their experience with, conceptualization of, and support-seeking decisions for ADHD.

### ELIGIBILITY CRITERIA

Aged 18+; identify as Black/African American; be the primary female guardian to at least one child (aged 7-10) with ADHD who identifies as Black; child must not currently use medication treatment for ADHD; must consent to audio/video recording

### DESIGN

1. Pre-screening and demographic survey (~15 minutes)
2. 45-60 minute interview (choice of Zoom or in-person\*)

\*In-person interviews will be in a location agreed upon by both participant and researcher
